

World Youth Skills Day 2025

Youth empowerment through AI and digital skills

86% of employers expect AI and information processing technologies to transform their business by 2030²

54% of countries have digital skill standards³

48% of students do not feel adequately prepared for an AI-enabled workplace⁴

90% of adolescent girls and young women in low-income countries are offline⁵

About **450 million youth** (7 out of 10) are economically disengaged, due to lack of adequate skills to succeed in the labour market⁶

AI is expected to reach **\$4.8 trillion** in market value by 2033, but its benefits remain highly concentrated⁷

According to a global UNESCO survey, less than **10%** of schools and universities provide formal guidance on AI⁸
